# Short-Term Study Abroad Programmes (ST-SAPs)

The ST-SAPs embody JGU's belief that education must transcend the confines of the classroom. These programmes are designed to unfold within the broader theatre of the world. Conceived as immersive academic journeys, these bespoke and meticulously designed programmes offered to students during their Summer and Winter semester breaks allow the students to critically engage with the curricula and ideas of eminent universities across the world and immerse themselves in global cultures and communities.

ST-SAPs are organised in collaboration with some of the world's prestigious universities. Each ST-SAP spans across a period of two or three weeks and is the culmination of rigorous deliberation with our partnered institutions, offering our students a deliberate triptych of experiences, fusing intensive classroom learning, industry, institutional, and field visits, and cultural immersion.

Through these programmes, students have the opportunity to learn and engage with some of the eminent scholars, practitioners, and experts in the world. These experiences allow students to engage in interdisciplinary dialogues and forge networks that resonate long after the completion of

these programmes. These experiences cultivate essential qualities of academic and intellectual agility, cultural empathy, and adaptability to thrive in a globalised professional world.

These programmes will allow the students to navigate diverse academic and professional ecosystems, equipping them with a nuanced understanding of cultural sensitivity. ST-SAPs also strengthen the academic and professional profile of the students, positioning them competitively for positions in a global landscape.

Every ST-SAP offered at JGU by IAGI is a distillation of JGU's broader vision to internationalise higher education for its students who yearn to witness, understand, engage, and ultimately shape the formation of the world around them. To the students at JGU, these programmes offer an opportunity to catapult into an ambition where curiosity will get transformed into wisdom, and ambition will meet perspective.
